

AM

LITERACY :

1. The sentence builder activity could be completed on the board as a class lesson and if you wanted to take up more time then get the children to write the sentences on the sheets or into an exercise book.
2. Phonics - children often confuse **ir** and **ur** and these worksheets look at where these letters occur. The first two have easy words and the next two are harder so you can give pages 3 and 4 to more able children.
3. The writing worksheets give the less able a structure to their work. The more able can create their own sentences about a trip to the seaside onto the second page without doing the first page.

NUMERACY:

1. The treasure chest worksheet can be a good starter for the lesson and could be copied onto the board as a class activity.
2. The worksheets on counting and sequencing look at numbers going up and down in ones up to 100 and in tens up to 200.

PM

PSHE - You can either start or end the day with the PSHE story, allow about 20 minutes for the story and follow-up discussions. The story, 'Duncan's First Day' is about how others can help a new pupil.

You may only have time for one practical session in the afternoon, here are two ideas:

1. **SCIENCE :** The science activity worksheets are about being hot and cold and what we wear when the climate is hot or cold. Talk about what is sensible to wear, such as a hat in sunny weather.

ART : If there is time for art they might like to draw their favourite clothes in either winter or summer.
