

AM

LITERACY :

1. The first activity in Literacy is about using a thesaurus . If you haven't got enough thesaurus books to go around then pair the children and they can think of different words to fit into the boxes. They have to rewrite the passage with new words so this activity may take longer than expected.
2. If the activity above only takes half the time then try the 20 minute Writer activity about hobbies. Give the children 10 minutes to plan their work then 20 minutes to write it.

NUMERACY:

1. The sudoku puzzles make a good starter for maths, if you have an interactive whiteboard you could save them to a pen drive then use it with the whole class.
2. The adding and subtraction activities cover up to 1000 and money problems. There are 7 pages so it should take the whole lesson.

PM

1. PSHE : The story 'The Broken Vase' is a hard hitting story about the consequences of losing your temper.
2. SCIENCE: The science is about the water cycle and introduces the children to the concepts of condensation, evaporation and precipitation. You'll need scissors for a cutting out activity.
3. ART : To go with the PSHE story the children could design a comic strip showing the key moments of the story.
