

AM

LITERACY :

1. The word work is based on the ending - *able* and the spelling rule about dropping the final 'e'. There are 4 pages of exercises which should take the first 20 minutes of a literacy lesson.
2. For the second half of a lesson the '20 Minute Writer' activity about writing a letter of complaint should give them practice writing letters. Give them 10 minutes to plan their work , then 20 minutes to complete their letter. It could be extended by writing a draft letter then re-writing it either on the computer or long hand.

NUMERACY:

1. The Brain Trainer is a good way to start a lesson. If they complete it too quickly then they could make up their own.
2. The number revision covers tables, addition and subtraction to hundreds and money problems. There are 8 pages so there is plenty to do.

PM

1. The PSHE story, 'The Lemonade Bottle' is a hard hitting story about the dangers of storing harmful liquids in a drink bottle.
2. The Science is about eating a healthy diet. There are 3 pages of activities and two of information.
3. Art can be designing a Health and Safety poster to go either with the PSHE story OR encouraging a healthy diet .
